MGMT402 Strategic Management

Reflective Journal - *Week 11*

Ayesh Jayasekara - CIM12137

Strategic Management - *In Action*

Strategic Management module helped to decode how a business operates and make strategic decisions for survival, expansion and growth. Understanding this ensures that we are capable of making critical decisions with well-calculated risks.

As with future career aspects of chasing on to leadership roles, the knowledge gathered throughout this module will definitely be helpful both while hunting for positions and carrying out leadership responsibilities.

In depth understanding of corporate, business & functional strategies can also be highlighted as another important learning outcome as it helps to function in leadership roles in large business entities in either of those layers as the case may be.
